

High-Risk Iv Medications in Special Patient Populations

By -

Springer London Ltd, United Kingdom, 2014. Paperback. Book Condition: New. 2011 ed.. 235 x 155 mm. Language: English . Brand New Book ***** Print on Demand *****.Critical Care Clinicians can use general drug references (Micromedex, Lexicomp) for data on dosing of high-alert medications in special patient populations but these references are not available to all healthcare clinicians, they are expensive and they are not specific to high-alert medications or critically ill patients. Doctors, nurses and pharmacists in the hospital setting will benefit from having one resource with all of this information. The purpose of this reference manual would be to guide critical care clinicians on dosing of high-alert medications in special patient populations. The most important feature of the book will be a summary of primary literature using tables when possible. This will be useful to readers because currently a reference book does not exist that guides clinicians in these difficult dosing decisions.

Reviews

This publication may be really worth a go through, and a lot better than other. It really is written in simple terms and never difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Natalie Abbott**

This book will not be simple to get going on reading but extremely exciting to read through. Yes, it can be playful, still an interesting and amazing literature. I am very easily could possibly get a delight of reading a written book.
