Reviews

This book will not be simple to get going on reading but extremely exciting to read through. Yes, it can be play, still an interesting and amazing literature. I am very easily could possibly get a delight of reading a written book.

Not illustrated. 1887 Excerpt: . . . river on the east, which carry off a great part of the rain falling on the Mats and the East side of Table Mountain, overflow their banks in the winter, and a large sheet of water stands for a considerable time to the north and north-east of the hill. It has generally been supposed hitherto that the rains or pressure in some way from this standing water were the chief agents in producing the changes of adjustment in the Transit-circle, and it was to test the truth of this supposition that I undertook the present investigation. Tables of the values of the errors were formed for every half-month from 1856 to 1882 by taking the mean of three or four determinations about the first of the month as the error on the first, and similarly for the 15th. The means of these semi-monthly values, though not strictly the mean of the year, will not differ much from the true mean. On three occasions, in 1856, 1860, and 1872, the amount of the level error was reduced by the insertion of tinfoil under the bearing plate of the western pivot; but as the level error was taken before and after these changes I have been able easily to allow for these changes and tabulate the errors in one uniform system. The following are the means of the 27 semi-monthly results for the level error, to which I propose chiefly to confine myself to-night: --s. a. -0-77-0-68--0-62--059--0-56--0-58 A...
