RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 118 pages. Original publisher: Ada, OK: U. S. Environmental Protection Agency, National Risk Management Research Laboratory, 1998- Subject: Zone of aeration -- Mathematical models. Excerpt: . . . CHAPTER 2. DESCRIPTIONS OF INFILTRATION MODELS 2. 1 Classification of Infiltration Models Six infiltration models ( Table 1 ) were chosen for inclusion in this document based on several considerations: ( 1 ) relatively simple approach, easy to use, and realistic in applications; ( 2 ) ability to handle various field conditions including surface ponding, non-ponding, various rainfall rates, surface runoff, and wetting and drying; and ( 3 ) application to both homogeneous or nonhomogeneous soil profiles. The categories presented are not considered to be all-inclusive, but do provide a wide range of model applications. Infiltration models can be divided into various categories, depending on the purpose of the model, boundary conditions, and the nature of subsurface systems. In this study, six categories were identified for which the models chosen could be associated. The categories were chosen for representativeness to site-specific conditions, which is discussed in the following. Table 1. Infiltration model classification. Category Model Selected Reference Semi-Empirical SCS model USDA-SCS, 1972 Homogeneous Philips two-term model Philip, 1957 Nonhomogeneous Green-Ampt model for layered systems Flerchinger et al. , 1988 Ponding Green-Ampt explicit model Salvucci and Entekhabi, 1994 Non-ponding Constant Flux Green-Ampt model Swartzendruber, 1974 Wetting and Drying Infiltration Exfiltration model Eagleson, 1978 2. 1. 1 Semi-Empirical Model: As indicated by the term empirical, these type infiltration models are developed entirely from field data and have little or no physical basis. The empirical approach to developing a field infiltration equation consists of first finding a mathematical function whose shape, as a function of time, matches the observed features of the infiltration...
